EDUCATIONAL SESSION TRACK DETAIL

ACH

This annual event draws nearly 2,300 buyers, recommenders and influencers—all with one thing in common: They're searching for innovative software, products and services benefitting payments professionals from financial institutions, corporate end-users, and governments.

COMPLIANCE & REGULATORY

Rules and regulations are the bedrock of financial services and payments, and provide the necessary surety for transactions. Although often viewed simply as an area of compliance, developments here also encompass innovation, transaction quality, opportunity and financial reward. Understanding the most crucial concepts and innovations will lead to positive, competitive results.

CORPORATE & END USER PERSPECTIVES

At the end of the day, it is all about the customer. Payers and payees are why we are here. These sessions are for and by end-user clients — practitioners from corporate, business, state and local government, higher education, and charitable and religious organizations — that originate and receive payments. Content focuses on their experiences and needs, and the solutions and business practices to help them succeed.

CYBERSECURITY & RISK

As payment and operating systems evolve, new threats and risks are introduced nearly as quickly. Staying a step ahead of those interlopers or fraudsters is key to mitigating loss of revenue, reputation and customer relationships. Sessions focus on emerging threats and ways to recognize risks to prevent loss, as well as provide the necessary surety for transactions.
